

*Now let's make some changes to our first program  
Here's the original code as reference.*

```
public class HelloWorld
{
    public static void main(String[] args)
    {
        System.out.println("hello world");
    }
}
```

We learned a bit about using escape characters in our class notes. In this assignment modify the original code in the following way.

- Using the new line escape code in the println statement above print and print the name of the high school you attend on the line below hello world.
- Modify the program again adding an additional println statement and print in quotes the name of your school mascot. For example:  
I'm a "Yellow Jacket" !

Be sure to add your header comments, compile and run the program, and past your output at the bottom of the program as a comment. It should look like this:

```
/*
 * Joe Zaengle
 * Date: 3/1/2015
 * Sanderson High School
 * hello world program
 *
 * Description: This is my first program! It prints "hello world". I'm officially a programmer.
 */
```

My code goes here.....

```
/* Sample Output */
/*
hello world
I attend Oneonta High School.
I am a "Yellow Jacket" !
*/
```
