

Program 3a

(Name Header)

Write a program that will print your name in large letters. This can be accomplished by using a character such as an asterisk "*" and forming characters approximately 8 characters tall by 8 characters wide. You may do your initials, first name and last name or first name and last name first letter. This class will be used as a program header for other programs you will be writing during the semester.

Be sure to add comments and a description to your program.

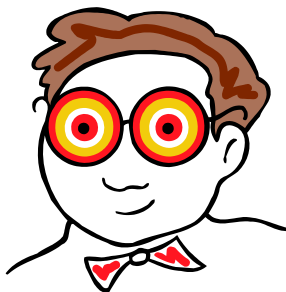

Statements Required: Output

Sample Output:

```
*****      *      ***** *      *
*           * *      *      * *      *
*           * *      *      * *      *
* ***** ***** *****      *
*      ** *      * *      *      *
*      ** *      * *      *      *
***** *      * *      *      *
```

HINT: Name the project Prog3a and name the class MyName

Use the following:

```
public class MyName
{
    public static void main (String[] args)
    {
        (your program goes here)
    }
}
```
